## About

Aspiring Software Engineer and B.Tech student with a solid technical background in full-stack technologies including Python, Java, and TypeScript. Committed to writing efficient code and leveraging analytical skills to solve complex problems. Seeking an entry-level opportunity to gain industry experience, collaborate with engineering professionals, and contribute to high-quality software solutions.

## Education

### Bachelor of Technology

Srinivasa Institute of Engineering and Technology

2024 – 2027 (Expected)

B.Tech in **Computer Science Engineering**

CGPA: 7.9/10.0

### Diploma / intermediate

Smt. B. Seetha Polytechnic College (Vishnu Educational Society)

2020 – 2024

Diploma in **Electrical and Electronics Engineering**.

Percentage: 80%

## Technical Skills

- **Languages:** Python, Java, JavaScript, TypeScript
- **Development:** Full Stack Development, Version Control (GitHub), VS Code
- **Core Competencies:** Problem Solving, Analytical Thinking, Team Collaboration

## Projects

### [ Project 1 Title – SugarBliss]

SugarBliss is a full-stack e-commerce web application designed to streamline sweet shop operations by managing product inventories, secure shopping carts, and customer billing. The system features a responsive frontend built for seamless user interaction across devices and a robust backend API to handle order processing and data management. By integrating these components, the project demonstrates a comprehensive understanding of end-to-end web architecture and standard retail platform workflows.

### [ Project 2 Title – Portfolio]

I maintain a comprehensive professional portfolio at [link], showcasing a curated collection of my full-stack development projects, including the SugarBill e-commerce application. This site serves as a live demonstration of my technical proficiency, featuring interactive project demos, detailed technical documentation, and direct access to my GitHub repository

## Strengths

- Quick Learner
- Analytical Thinking
- Adaptability
- Time Management
